DETAILED ACTION

Claim Objections

Claim 13 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must recite the claims from which they depend in the alternative and may not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5-8 102(b) as clearly anticipated over Wallquist et al, US Patent No. 5,738,719 or Rochat et al, US Patent No. 4,579,949.

Each of Wallquist et al. and Rochat et al. discloses polymeric compositions comprising diketopyrrole pigments that correspond to those of the presently claimed invention. No patentable difference may readily be ascertained between the present and patented inventions. See Wallquist et al. at col. 1, line 66 through col. 5, line 62. See Rochat et al at col. 4, lines 8-28 and col. 7, line 60 through col. 8, line 4.

Claim 9 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rochat et al, US Patent No. 4579949.

Rochat et al indicates that polyacrylates may be colored with the diketopyrrole pigments of the invention. See col. 7, line 60 through col. 8, line 4.
